SUMMARY

Software Engineering student passionate about software development, distributed systems, and artificial intelligence technologies. Experienced in designing backend applications, microservices architectures, and AI-powered solutions leveraging Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), and data-driven systems. Seeking an internship opportunity to contribute to innovative projects in Software Engineering, Artificial Intelligence, or Data Analytics while continuously expanding my technical expertise.

PROFESSIONAL EXPERIENCE

Summer Internship

07/2025 – 08/2025 | Medenine ,Tunisia

Regional Transport Company of Medenine (SRTM)

Redesigned the official SRTM website and contributed to the development of a modern web and mobile platform. Integrated GTFS transportation data to provide schedule consultation and route planning functionalities. Centralized and enhanced transport data through a user-friendly interface and administrative dashboard.

Final-Year Internship

02/2024 – 05/2024 | Sousse ,Tunisia

Chaaben Technology Group

Developed a web and mobile application connected to IoT sensors to automate irrigation processes and monitor environmental conditions in real time.

Summer Internship

08/2023 | Sousse ,Tunisia

UNIMED Medical Laboratory

Observed and analyzed production processes, learned industrial machine operations, and contributed to the design of an electrical control cabinet for SAS door locking systems.

Summer Internship

07/2022 | Medenine ,Tunisia

Tunisian Post

Handled mail processing operations, including dispatching and reception activities, and participated in data management and daily accounting procedures.

EDUCATION

Engineering Degree in Computer Science

2024 – Present | Sousse, Tunisie

Higher Institute of Applied Sciences and Technology of Sousse (ISSATSo)

Specialization: Software Engineering

Bachelor's Degree in Embedded Systems

2021 – 2024 | Sousse, Tunisie

Higher Institute of Applied Sciences and Technology of Sousse (ISSATSo)

Mathematics Baccalaureate

2020 – 2021 | Médenine, Tunisie

Route de Gabès High School

SKILLS

Backend Development

Java, Spring Boot, Spring Cloud, Node.js, Express.js, PHP, Laravel, Symfony, Python, FastAPI, REST APIs, Microservices

AI & Data Engineering

RAG, LLM Integration, Ollama, Chatbots IA, Prompt Engineering, ETL Fundamentals, Data Modeling, OLAP

Tools & DevOps

Git, GitHub, Docker, VS Code, IntelliJ, Android Studio, Figma

Frontend Development

HTML, CSS, JavaScript, TypeScript, Vue.js, React, Bootstrap, Tailwind CSS

Databases

SQL, Oracle, PostgreSQL, MongoDB

Soft Skills

Teamwork, Communication, Adaptability, Problem Solving, Autonomy

Mobile Development

Flutter, Cordova

Architecture & Methodologies

Domain-Driven Design (DDD), Event-Driven Architecture, Microservices, UML, Agile/SCRUM, Kafka, RabbitMQ

PROJECTS

ERMA — AI-Powered Skincare E-Commerce Platform Developed an AI-powered skincare e-commerce platform. • Implemented product, order, and loyalty management functionalities. • Integrated AI-based skin analysis and personalized product recommendations. • Developed a domain-specific chatbot powered by RAG and Ollama. Technologies: React, TypeScript, Tailwind CSS, Django, Django REST Framework, Ollama, RAG.	03/2026 – 05/2026
UniCursus — University Management Platform Developed a full-stack university management platform. • Managed students, instructors, academic modules, and results. • Built REST APIs and automated notification services. • Integrated an AI assistant based on RAG and Ollama for contextual document retrieval and question answering. Technologies: React, TypeScript, Node.js, PostgreSQL, FastAPI, Ollama, RAG.	02/2026 – 04/2026
EventHub — Event Booking Platform Developed an event management and booking platform with secure REST APIs. • Managed events and reservations. • Implemented JWT authentication and WebAuthn Passkeys. • Containerized the platform using Docker and automated deployment workflows with GitHub Actions. Technologies: Symfony 8, PHP 8.4, MySQL, Doctrine ORM, JWT, Docker, GitHub Actions.	11/2025 – 12/2025
E-Learning Platform — Spring Cloud Microservices Developed a microservices-based e-learning platform. • Implemented secure authentication using JWT. • Integrated Service Discovery with Eureka and API Gateway routing. • Enabled inter-service communication through RabbitMQ and REST APIs. Technologies: Java 21, Spring Boot, Spring Cloud, Eureka, API Gateway, RabbitMQ, JWT, REST APIs.	10/2025 – 12/2025
RMA Service — REST & Event-Driven Microservices Developed a Return Merchandise Authorization (RMA) system using both synchronous REST and event-driven architectures. • Applied Domain-Driven Design (DDD) principles. • Developed REST APIs and business workflows for refund and exchange management. • Implemented asynchronous communication using Apache Kafka. • Managed business events and workflow orchestration. Technologies: Java 17, Spring Boot 3, Apache Kafka, Docker, JPA, H2, REST APIs.	10/2025 – 12/2025

CERTIFICATES

• Building RAG Agents with LLMs - NVIDIA • Computer Vision for Industrial Inspection - NVIDIA • ccnal: Introduction to Networks - CISCO	• Fundamentals of Accelerated Data Science - NVIDIA • getting started with Ai on jetson nano NVIDIA • ccna2: Switching, Routing, and Wireless Essentials - CISCO	• Power BI • Develop, Customize, and Publish in Omniverse With Extensions - NVIDIA • Introduction Bootstrap
